

Response to Office Action Dated March 17, 2005

S/N 1U/668,091

In the Claims

1. (Currently Amended) A one piece multi-purpose hand tool,
comprising:
a socket body having a socket at a first end;
a key tip; and
an arm portion connected between a second end of the socket body and the
key tip, wherein the arm portion defines an opening to receive a torque arm
device,
wherein the socket body, the key tip, and the arm portion are of one piece.
unitary construction.
2. (Original) The tool of claim 1, wherein the key tip includes a hex key
tip.
3. (Original) The tool of claim 1, wherein the key tip defines a notch in an
end of the key tip opposite the arm portion.
4. (Previously Presented) The tool of claim 1, wherein the opening
extends partially through the arm portion.
5. (Original) The tool of claim 1, wherein the tool includes a material
selected from the group consisting of metal, metal alloys, steel and steel alloys.

1 6. (Original) The tool of claim 1, further comprising a plastic sheathing
2 around the socket body.

3
4 7. (Original) The tool of claim 1, wherein the socket defines an opening
5 for receiving a second tool.

6
7 8. (Currently Amended) A one piece multi-purpose hand tool,
8 comprising:

9 means for torquing a first female fastener;

10 means for socket wrenching the second fastener; and

11 an arm portion connected between the means for torquing and the means
12 for socket wrenching, wherein the arm portion defines an opening to receive a
13 torque arm device,

14 wherein the means for torquing, the means for socket wrenching, and the
15 arm portion are of one piece, unitary construction.

16
17 9. (Original) The tool of claim 8, wherein the means for torquing includes
18 a key tip.

19
20 10. (Original) The tool of claim 9, wherein the key tip includes a hex key.

21
22 11. (Original) The tool of claim 10, wherein the means for socket
23 wrenching includes socket body having a socket.

1 12. (Original) The tool of claim 11, wherein the arm portion is multi-
2 sided.

3
4 13. (Original) The tool of claim 12, wherein the key tip defines a notch in
5 an end of the key tip opposite the arm portion.

6
7 14. (Previously Presented) The tool of claim 13 wherein the opening
8 extends partially through the arm portion.

9
10 15. (Original) The tool of claim 14, further comprising a plastic sheathing
11 around the socket body.

12
13 16. (Currently Amended) A set of tools, comprising:
14 a first tool including a first socket body having a first socket, a first key tip,
15 and a first arm portion connected between the first socket body and the first key
16 tip, wherein the first arm portion includes a torque arm opening to receive a torque
17 arm device; and

18 a second tool including a second socket body having a second socket, a
19 second key tip, and a second arm portion connected between the second socket
20 body and the second key tip,

21 wherein the ~~first~~ second tool is removably interconnected ~~to~~ disposed within
22 the ~~first~~ second tool, and further wherein the torque arm opening of the first arm
23 portion remains accessible to receive the torque arm device.

1 17. (Original) The set of tools of claim 16, wherein the second key tip and
2 the second arm portion extend into a first opening defined by the first socket of the
3 first tool.

18. (Original) The set of tools of claim 17, wherein:
the second socket of the second tool defines a second opening; and
the size of the first opening of the first tool does not equal the size of the
second opening of the second tool.

19. (Original) The set of tools of claim 18, wherein a circumference of the first key tip of the first tool does not equal a circumference of the second key tip of the second tool.

20. (Previously Presented) The set of tools of claim 19, wherein:
the torque arm opening extends partially through the first arm portion;
the first key tip includes a first hex key; and
the second key tip includes a second hex key.
